

Xuan Linh Anh Hoang

Fairy Meadow, NSW 2519 | 0492 912 496 | linhanhxx@gmail.com

Professional Summary

Recent Bachelor of Information Technology graduate specialising in Web Design and Development, with experience developing web and mobile applications through university projects. Skilled in HTML, CSS, JavaScript, PHP, MySQL and Figma, with experience in UI/UX design, responsive web design, database development and requirements analysis. Experienced in collaborating within Agile project teams to translate user requirements into functional and user-friendly solutions. Seeking an entry-level opportunity to contribute to a professional technology team through a combination of technical, design and problem-solving skills.

Technical Skills

Web: HTML, CSS, JavaScript, PHP

Database: MySQL, Relational Database Design

UI/UX: Figma, UI/UX Design, Responsive Web Design

Programming: Java, Python

Tools: GitHub, Android Studio, XAMPP, Flutter

University Projects

EasyEVCharging – EV Charging Management Web Application | Full-Stack Developer

Technologies: PHP, MySQL, HTML, CSS, JavaScript, XAMPP

- Developed a web-based application for managing electric vehicle charging locations and charging sessions.
- Implemented user and administrator authentication, charging location management and charging session functionality using PHP and MySQL.
- Designed and implemented a relational database structure for users, charging locations and charging sessions.
- Built responsive web interfaces using HTML, CSS and JavaScript to provide a clear and user-friendly experience.
- Applied server-side validation and prepared SQL statements to improve data integrity and application security.

GroceWise – Grocery Price Comparison Mobile Application | UI/UX Designer & Front-End Developer

Technologies: Flutter, Dart, Figma, Android Studio, GitHub

- Analysed project requirements and translated user needs into application features and user flows.
- Designed the mobile application interface and user flows in Figma, focusing on usability, consistency and intuitive navigation.
- Developed and refined front-end interfaces for core features including product comparison, shopping lists and multi-store shopping.
- Collaborated with team members using GitHub and Agile project practices to integrate features and resolve development issues.
- Contributed to testing and refinement of the application based on usability and functional requirements.

Education

Bachelor of Information Technology – Web Design and Development

University of Wollongong, Wollongong, NSW

Completed July 2026

Other Experience

Front of House Employee | Treasure Court Chinese Restaurant | Mar 2024 – Present

- Communicate effectively with customers and team members in a fast-paced environment.
- Manage multiple priorities while maintaining accuracy and attention to detail.
- Support team operations and assist in training new staff.
